- Overlooking inspection points

Sample Opito Rigging Level 3-4 Test Questions and Explanations

Q1: What is the maximum safe working load of a 6 x 36 wire rope sling with a length of 10 meters?

Answer: The maximum load depends on the sling's rated capacity, which is specified by the manufacturer and marked on the sling. For example, a 6 x 36 wire rope sling may have a working load limit (WLL) of approximately 18 tonnes at a certain diameter. Always consult the sling's data sheet and consider the sling angle, which reduces capacity. At a 45-degree angle, the capacity is multiplied by a factor (~1.4). Therefore, precise calculation requires specific data.

Q2: During inspection, you notice a sling with broken wires and corrosion. What should you do?

Answer: The sling should be tagged out of service immediately. Damaged or corroded slings compromise safety and should be replaced. Regular inspection intervals and adhering to manufacturer guidelines are vital.

Q3: You are lifting a load with an uneven weight distribution. How should the slings be arranged?

Answer: The slings should be placed to ensure even load distribution, possibly using multiple slings with appropriate angles. The load should be balanced so that no sling is overloaded, and the center of gravity should be considered to prevent tipping or swinging.

Final Tips for Success

- Understand the Regulations: Familiarize yourself thoroughly with LOLER and other relevant standards.
- Practice, Practice, Practice: Use mock tests and scenario questions to build confidence.
- Focus on Safety: Remember, safety is paramount; questions often emphasize safe practices.
- Attend Practical Workshops: Hands-on training solidifies theoretical knowledge.
- Stay Updated: Industry standards and best practices evolve; make sure your knowledge is current.

Conclusion

Mastering the Opito Rigging Level 3-4 test questions requires a balanced approach of theoretical knowledge and practical understanding.
