Because of these properties, mastering color mixing in oil acrylic watercolor requires an understanding of how the medium responds to different blends and how to achieve consistent results.

The Foundations of Color Mixing in Oil Acrylic Watercolor

To create your 1500 color mixing recipes, it's essential to understand the basics of color theory:

Primary Colors

- Red
- Blue
- Yellow

These are the foundational hues from which all other colors are derived.

Secondary Colors

- Orange (Red + Yellow)
- Green (Blue + Yellow)
- Purple/Violet (Blue + Red)

Tertiary Colors

Created by mixing a primary with a neighboring secondary, e.g., yellow-orange, blue-green, red-purple.

Tints, Shades, and Hues

- Tints: Color mixed with white for lighter shades
- Shades: Color mixed with black for darker tones
- Hues: The pure color without addition of black or white

Building a Color Mixing Strategy

To systematically develop your recipes, follow this structured approach:

- Start with Primary Colors

Establish a core palette of high-quality primary colors. Use these to generate a wide array of hues.

- Use Color Wheels as Guides

Consult a color wheel to understand complementary, analogous, and triadic color schemes.

- Record Each Mixture

Maintain a detailed log of ratios, colors used, and the resulting hue. This forms the backbone of your "recipe database."

- Experiment with Tints and Shades

Create lighter and darker versions of each hue for versatility.

- Incorporate Additives

Use mediums, glazing liquids, or retarders to modify drying time, transparency, or texture, expanding your palette of recipes.
