- Fine-tip pens for labeling
- Paper (preferably A4 size or larger)

Having the right tools will ensure your diagram is neat, accurate, and easy to label.

Step-by-Step Guide to Drawing a Sheep

Drawing a sheep involves several stages, from sketching the basic shape to adding details and labels. Follow these steps for an effective diagram:

1. Sketch the Basic Outline

- Begin with a light pencil sketch.
- Draw an oval or rounded rectangle for the body ? this should be large and fluffy-looking.
- Sketch a smaller circle or oval for the head, positioned at one end of the body.
- Add four legs under the body, using straight or slightly curved lines.
- Draw a short tail at the rear end of the body.

2. Add Details to the Body

- Outline the woolly fleece by adding wavy or curly lines around the body.
- Slightly round the edges to make the fleece look fluffy and soft.
- Sketch the ears, which are usually small and pointed or rounded, attached to the top of the head.
- Draw the face with features like the nose, mouth, and eyes.

3. Refine the Drawing

- Erase unnecessary sketch lines.
- Add shading or texture to the fleece to make it appear fluffy.
- Detail the legs, adding hooves at the bottom.
- Draw the eyes with pupils, and add nostrils and a mouth to the face.

4. Add Labels to Key Parts

- Use straight lines or arrows to connect labels to the corresponding parts.
- Write clear, legible labels near each arrow.

Key Parts of a Sheep to Label in Your Diagram

To create an informative diagram, include and label the following parts:

Head

- Ears: Sensory organs for hearing.
- Eyes: Provide vision.
- Nose/Nostrils: For breathing and smelling.
- Mouth: For eating and vocalization.
- Face/Facial features: Including the jaw and lips.

Body

- Fleece/Wool: Thick, curly wool covering the body.
- Back: The upper part of the body.
- Chest: Front part of the body below the neck.
- Abdomen: Under the body, near the hind legs.
- Tail: Small, often fluffy tail at the rear.

Legs
