- 3.8L V6 Engine: An upgraded option delivering around 215 horsepower and 245 lb-ft of torque, offering improved performance and towing capacity.
- Transmission: Most models featured a 4-speed automatic transmission (245LE or 41TE), ensuring smooth shifting and ease of driving.

These engines emphasized reliability and fuel efficiency, with the 3.8L offering a slight edge in performance.

Ride Quality and Handling

The Grand Voyager prioritized comfort over sporty handling:

- Suspension: Independent MacPherson strut front suspension and a multi-link rear suspension contributed to a smooth ride.
- Steering: Power-assisted rack-and-pinion steering provided manageable maneuverability for a vehicle of its size.

While not designed for high-performance driving, the vehicle excelled at family transport, offering stability and comfort on various road conditions.

- 3.3L V6: Approximately 18-20 mpg city/highway.
