We will explore the structure of a SOAP note, provide an example specific to counseling, and discuss tips to tailor your notes to various therapeutic settings.

Understanding the SOAP Format in Counseling

Before diving into an example, it's important to understand what each component of the SOAP note entails, especially in the context of counseling.

Subjective (S)

This section captures the client's reported experiences, feelings, thoughts, and perceptions during the session. It reflects the client's perspective and is often quoted directly.

Examples:

- "I feel overwhelmed with my work deadlines."
- "I've been having trouble sleeping and feeling anxious at night."
- "I don't think I've made any progress since our last session."

Objective (O)

Here, the counselor records observable data and measurable information. This may include the client's appearance, behavior, mood, affect, and any relevant test results or assessments observed

during the session.

Examples:

- Client appeared visibly anxious, fidgeting and avoiding eye contact.
- Mood was reported as "depressed," and affect was flat.
- The client completed a mood checklist, showing elevated scores for anxiety.

Assessment (A)

The assessment synthesizes subjective and objective data, providing the counselor's professional interpretation of the client's current state, progress, or challenges.

Examples:

- The client demonstrates persistent anxiety and low mood, consistent with generalized anxiety disorder.
- Notable improvement in coping skills since last session.
- Challenges with motivation are impacting progress toward goals.

Plan (P)

This section details the next steps, interventions, referrals, or homework assigned. It guides future sessions and client actions.

Examples:

- Continue cognitive-behavioral therapy focusing on anxiety management.
- Assign journaling exercises to identify triggers.
- Follow up on sleep hygiene strategies next session.

Sample SOAP Progress Note Example in Counseling

Below is a detailed example of a SOAP note tailored for a counseling session with a client experiencing anxiety and depression. This example demonstrates how to effectively document each section.

Subjective

The client reports feeling "more anxious than usual" over the past week, particularly when facing social situations. She states, "I feel like everyone is judging me," and admits to avoiding social gatherings. She also mentions feeling "down and unmotivated," with difficulty getting out of bed most mornings. The client reports trouble sleeping, waking up multiple times during the night, and feeling tired during the day. She expresses concern about her progress, stating, "I don't see any improvement, and I feel like I'm stuck."

Objective

During the session, the client appeared disheveled, with poor eye contact and a flat affect. She was noticeably tense, frequently wringing her hands. Her speech was soft but coherent. She scored 18 on the GAD-7 (Generalized Anxiety Disorder 7-item scale), indicating moderate anxiety, and 14 on the PHQ-9 (Patient Health Questionnaire), suggesting moderate depression. No psychomotor agitation or retardation observed.

Assessment

The client continues to experience symptoms of generalized anxiety and depression, which appear to be exacerbated by social stressors and sleep disturbances. There is some progress in verbalizing feelings and identifying triggers, but overall mood remains low, and anxiety levels are moderate. The client demonstrates insight into her condition but struggles with motivation and avoidance behaviors, which impede progress.

Plan

- Continue weekly cognitive-behavioral therapy (CBT) sessions focusing on exposure to social situations and cognitive restructuring.
- Introduce relaxation techniques, such as diaphragmatic breathing and progressive muscle relaxation, for anxiety management.
- Assign journaling prompts to reflect on social fears and positive experiences.
- Refer the client to a psychiatrist for evaluation of medication options if symptoms persist or worsen.
- Monitor sleep patterns and discuss sleep hygiene strategies in the next session.
- Reassess anxiety and depression levels using GAD-7 and PHQ-9 in two weeks.
